Location: DTC

Bross Group is a premier IT Consulting and Staffing firm headquartered in Lakewood, CO. We specialize in assisting our clients in the identification of the best IT professionals for their consulting, staff augmentation, direct placement, and application development needs. With over 20 years experience in the IT Consulting industry, we are set apart by our commitment to the success of our clients and goal of making the candidate experience a positive one.

As an Enterprise Architect you will be responsible for developing both the long term strategy and short term tactical approach to evolving business systems. You will operate as an integral part of the development team developing engineering patterns and practices, mentoring developers on approach and execution of solutions, coaching on new technologies and establishing a team wide comprehension of our solution capabilities and direction. You will be required to provide evidence of value and assessment of risk for current and future solutions, technologies and applications to the management team. You will be expected to research, prototype and demonstrate the application of valuable technologies and qualify the patterns, methodology and skills needed to implement. When needed you will lead a scrum team or a meta scrum in the role of scrum master for the purposes of initial solution development and will need to participate as a developer proficient in all necessary development languages and tools. You will act as the primary interface to the Quality Assurance, Software Configuration Management and Project Management groups as it pertains to the efforts you lead. The primary focus of this role is to ensure consistency and adherence to the vision of our solutions.

Essential Duties and Responsibilities:

- Research and prove technical solutions, while Establishing and educating team on architectural practices.
- Provide architectural guidance, Identify, demonstrate and educate team on engineering patterns.
- Communicate vision and mentor team members, while delivering demonstrable prototypes, giving guidance in areas of expertise
- Identify and qualify industry standards, 3rd party applications and solutions.
- Perform peer code reviews and work closely and professionally with other Agile Scrum team members.

Required Skills:

- Bachelor's Degree in computer science or similar field preferred; Minimum of 10 years experience; and/or training; and/or equivalent combination of training and experience.
- Previous management or team lead experience required.
- Advanced comprehension of C# and/or C++.
- Proficiency in .Net required.
- Experience in Windows Workflow Foundation, Windows Presentation Foundation and Windows Communication Foundation preferred.
- Experience and proficiency in designing and implementing Service Oriented Architectures.

- Experience in with Enterprise Service Bus technologies.
- Experience and proficiency in Enterprise Application Integration.
- Proficiency in SOAP, RPC and Document literal communications.
- Experience and proficiency in Composite, Distributed and Service based solutions.

All qualified applicants will receive consideration for employment without regard to race, sex, creed, religion, color, national origin, sexual orientation, veteran status, and mental or physical disabilities. US citizens and Green Card Holders and those authorized to work in the US are encouraged to apply. We are unable to sponsor H1b candidates at this time.
