

DEVELOPER: BPMS .NET_4291

Location: Broomfield, CO

Send resumes to: lbackes@brossgroup.com

Bross Group is a premier IT Consulting and Staffing firm headquartered in Lakewood, CO. We specialize in assisting our clients in the identification of the best IT professionals for their consulting, staff augmentation, direct placement, and application development needs. With over 20 years experience in the IT Consulting industry, we are set apart by our commitment to the success of our clients and goal of making the candidate experience a positive one.

BPMS .NET Application Developer position will be part of a software team focused on working closely with clients and other stakeholders to produce high quality workflow solutions. BPMS .NET Application Developer position will provide business personnel with the ability to query, display, and analyze corporate workflow processes. This position will be required to apply sound solutions framed within the context of enterprise software principles in support of a wide variety of corporate functions and products. Candidate will be responsible for solving a wide array of workflow related business problems through skills as described below. Under general supervision, the BPMS .Net Application Developer will be responsible for the development, unit testing, and deployment of user interface (UI) solutions and enhancement implementations within our BPMPortal application as specified by System Analyst and Lead .NET Developer roles. Additionally, the developer may be requested to assist in problem investigation, analysis, and resolution of newly identified defects. The individual will be responsible for .NET software development within the existing application and work with the entire application team to ensure development conforms to performance optimization and interoperability standards and requirements. The individual should be a fast learner and self trainer.

REQUIREMENTS:
